

Guardr

Anytime. Anywhere. Security, When You Need It.

Client User Manual

Hire independent contractors, post jobs, pay, and confirm coverage

Standalone printable manual — print this PDF alone or use the combined binder (**Guardr-User-Manuals-Combined.pdf**) which contains this file unchanged.

Audience	Personal and business clients
Document date	September 26, 2026
Format	US Letter · standalone print PDF
File	Guardr-Client-User-Manual.pdf
Operator	Signature Security Specialist, LLC
Product	guardr.co

Guardr is a technology marketplace platform. It is not a private patrol operator, security guard employer, or staffing agency. Guards and clients contract directly for each job. This document is for operational training and end-user reference.

For **personal** and **business** clients who need licensed security coverage.

Who you hire on Guardr (read this first)

Guardr is operated by **Signature Security Specialist, LLC** as a **technology marketplace only**.

What Guardr is	What Guardr is not
A platform to post jobs and connect with licensed independent contractor guards	Your security company, PPO, or staffing agency
A payment facilitator and credential review tool	The employer or supervisor of guards on your site
A way to approve who works your property	A dispatcher that assigns guards without your approval (marketplace jobs)

Guards on Guardr are independent contractors. They do **not** work for Guardr. For each job, you engage the guard **directly** for that assignment. Guardr is not a party to your on-site security relationship.

Guardr staff (Support through Founder) are **employees of Signature Security** who operate the platform. They verify accounts and credentials, review job listings, and handle payments pipeline — they do **not** provide guards as employees of Guardr.

Related: [Quick Start](#) · [Guard Manual](#) · In-app **Guide**

Where you use Guardr

Surface	What you do there
guardr.co (browser)	Sign-up, activation checklist, account shell — profile, credentials, billing/payment history, Downloads (Customer APK), support, legal documents, Guide
Customer app (Android)	Map, Home, Jobs, Guards, Messages , live coverage, post jobs, approve guards, pay on jobs

After staff **approve** your account, install the **Customer app** from **Account** → **Downloads** or guardr.co/download. Operational pages (map, jobs, guards) are **not** available in a plain browser tab once you are active — use the app.

Optional **Messenger** app: messages and support for your signed-in role; it does not replace the Customer app.

1. Account setup

1. Go to guardr.co and choose **I need security**.
2. Choose **Personal** or **Business** — this is **who hires and pays**, not the type of location.
 - **Personal:** you contract as yourself. You can still hire for a venue. Request, rebook, and schedule recurring coverage anytime.
 - **Business:** a company, venue, or organization is the contracting party. Extra tools for sites, staffing, reporting, and team contacts. You can still post a private event.
3. Complete profile details under **Profile**. Upload **Credentials** there (government-issued ID is always required).
4. On **Home**, watch for **Account pending approval**.
5. While pending you can use account **Home**, **Profile**, and **Guide** on the website; install the Customer app when you are ready. Field ops stay blocked until staff approve you and you use the **Customer app**.
6. After approval, open the **Customer app** for map, jobs, guards, and messages. The website account shell remains for profile, billing, downloads, and support. Personal and business share one client system — business unlocks management tools in the app.

Want a job at Guardr (ops/support)? Use **Apply to work at Guardr** — not the client path.

2. Main pages (Customer app)

These pages live in the **Customer Android app** (and the installed Customer shell), not in a marketing browser tab after activation.

Page	Purpose
Map	Job geography, pins, live shift tracking
Home	Status, quick actions, live coverage. Personal: request / rebook / recurring. Business: post job / sites / reports
Jobs	Post or request coverage, pay, approve guards, confirm audits, overtime, ratings
Guards	Browse profiles; send a direct request or rebook
Messages	Job chats and threads
Support	Contact support, file a report, ticket history
Payments / Billing	Invoices and payment history (personal: Payments; business: Billing)
Locations / Sites	Saved places (personal: Locations; business: Sites)
Reports	Activity and incidents — business accounts only

Page	Purpose
Profile / Settings / Guide	Account details, Credentials , preferences, help

3. Post a marketplace job

Open work any qualified guard can apply to. Personal accounts call this **Request security**; business accounts call this **Post job**.

1. **Home** → **Post job / Request security**, or **Jobs** → **+ Request security / + Post a job**.
2. Enter site/title, address, schedule, requirements, instructions, and **hourly rate / billing**.
3. On location: **Use current location** if you are on site, or enter address/coordinates manually.
4. Review the summary → **Slide to post job offer**.
5. Status starts as **Pending review** until staff approve the listing → then **Open**.

Required client credentials for your account type and this job type must be **verified** before you can post. Upload them on **Profile** → **Credentials**.

Staff review job offers from **Applications / Jobs**. If declined, update the job as instructed and resubmit when allowed.

3a. Credentials you may need

Profile → **Credentials** is your credential library.

Always required	Who
Government-issued ID	Every personal client
Government-issued ID (authorized representative)	Every business client

Other licenses and permits (alcohol, event, cannabis, business license, and so on) stay in the library until staff mark them **Required For** a job type. Alcohol licenses default to nightclub/bar jobs; event permits default to event job types.

Each row shows **name** → **applicable to** → **required for** → **upload** → **expiration** → **verification status**.

4. Request a specific guard

1. Open **Guards** → select a profile.

2. Review resume, licenses, experience, and availability.
3. **Send assignment request to [name]** → complete site, schedule, instructions, and pay.
4. **Slide to send request to [name]**.
5. Track it under **Jobs**.

You already chose the guard — no later **Approve guard** step for that person. The guard must **claim** the request; payment and staff rules still apply.

5. What you pay — costs, fees, and billing

This section explains **your** charges as a client. You pay the **posted hourly rate** (and approved extras). Guardr retains a **platform fee** from that rate — the guard receives the remainder. You typically see the **client rate** on job cards and checkout, not a separate platform fee line.

5.1 Base job cost

Estimated job total is generally:

Hourly rate × billable hours × number of guards needed

Factor	Notes
Hourly rate	Set when you post the job (or negotiated on open-contract jobs)
Billable hours	Scheduled duration; unpaid breaks may reduce billable time
Guards needed	Multi-guard jobs multiply the base
Crew jobs	Coordinated crew assignments may include a small per-guard rate adjustment on the client bill

Example: \$50/hr × 8 hours × 2 guards = **\$800** base estimate before overtime or extras.

5.2 Platform fee (how Guardr earns)

Guardr's platform fee is embedded in the marketplace economics:

Party	Receives
Guard (contractor)	Hourly rate minus platform fee per hour
Guardr (platform)	Platform fee per hour from the Personal or Business fee table for that guard type

Personal and business accounts have **separate** fee tables. Each table has an account default plus optional per-guard-type rates (Directors set these in **Payment settings**). Defaults start around **\$5/hr**

personal and **\$6/hr** business, with higher takes on some job types (for example bodyguard / armed escort).

You pay the **full hourly rate** you agreed to. The guard's pay is calculated from that rate minus the fee. This is **not** an extra line item on most client checkout screens — it is part of how the marketplace price is split.

Posted prices stay frozen. Changing the live fee tables does **not** rewrite jobs that are already posted, approved, or under contract. Those jobs keep the platform fee and guard pay saved when they were created. Only a staff/open-contract recalculation rewrites a stored fee.

5.3 When you pay

1. **Before the shift (typical):** Pay by card on the job (**Pay Now** / Stripe checkout) after staff approve the listing and before or as guards are assigned.
2. **After completion:** Formal **invoices** may appear under **Payments** for completed work (**Draft** → **Payment due** → **Paid**). Download PDF and pay by card when due.

Payment status on **Jobs** shows whether the job is unpaid, paid, held (complete), or fully settled after guard payout.

5.4 Overtime

If a guard clocks out late, **overtime** may be calculated at your hourly rate (× guards as applicable).

1. Open **Jobs** → flagged job → **Late clock-out overtime**.
2. **Approve overtime \$X** and pay by card when prompted, or **Dispute charge** if incorrect.

Guard payout is blocked until overtime is resolved.

5.5 Schedule changes and extensions

If you extend a job schedule after posting, an **additional amount** may be required before the new schedule applies. Pay when prompted on the job.

5.6 Tips (optional)

After a completed job and review, you may leave an optional tip (minimum \$1; common presets \$5 / \$10 / \$20). Tips go to the guard through the platform payment flow.

5.7 Open-contract / negotiated pricing

On jobs that support price negotiation, you and the guard may agree on an hourly rate. The agreed rate updates what you pay and what the guard earns. Platform fee rules still apply per the negotiated terms shown before you confirm.

5.8 What Guardr does not charge you for separately

Guardr staff do **not** bill you as a staffing agency markup on top of an undisclosed guard wage. You contract **directly** with the guard at the **rate shown on the platform** for that job.

6. Approve or decline applicants (marketplace)

1. Open **Jobs** → open an **Open** job.
2. Review the guard who applied.
3. **Approve guard** → job becomes **Accepted**, or **Decline guard** → keep the job open.

Applications go **to you**, not to a staff dispatcher. Guardr does not pick who works your site.

7. During the shift

The **guard** (independent contractor) starts and ends the shift. You watch and confirm.

1. **Jobs, Home** → **Live coverage**, or **Map** for assignment and live tracking.
2. **Messages** or job chat to coordinate.
3. When the guard clocks in with photos, open the job → **Guard self-audit photos** → review → **Confirm self-audit photos**.
4. If the guard skipped photos, the job may show **No Self Audit** until they upload.

Reports

- **Home** → **Reports** for incident, activity, and property reports.
 - **Support** → **File a report** for formal complaints or safety concerns.
-

8. Completion and rating

1. Guard ends the shift → job becomes **Completed**.
 2. Review reports, photos, overtime, and payment notices on **Jobs**.
 3. Rate the guard when prompted; optional tip after review.
 4. Guard payouts release through the platform after the normal delay unless a dispute holds them.
-

9. Typical marketplace sequence

Post job → Staff review → Open → You pay → Guard applies → You approve
→ Guard works shift (you confirm self-audit) → Completed → Invoice / rate

Direct-request sequence skips “guard applies / you approve” and uses **claim** instead.
