

Guardr

Anytime. Anywhere. Security, When You Need It.

Guard User Manual

Independent contractor credentials, shifts, earnings, and payouts

Standalone printable manual — print this PDF alone or use the combined binder (**Guardr-User-Manuals-Combined.pdf**) which contains this file unchanged.

Audience	Licensed independent contractors
Document date	August 18, 2026
Format	US Letter · standalone print PDF
File	Guardr-Guard-User-Manual.pdf
Operator	Signature Security Specialist, LLC
Product	guardr.co

Guardr is a technology marketplace platform. It is not a private patrol operator, security guard employer, or staffing agency. Guards and clients contract directly for each job. This document is for operational training and end-user reference.

For licensed, independent security professionals who find work on Guardr.

Who you are on Guardr (read this first)

Guardr is operated by **Signature Security Specialist, LLC** as a **technology marketplace only**.

You are	You are not
An independent contractor who chooses which jobs to accept	An employee, agent, or partner of Guardr
In a direct service relationship with the client for each assignment	Dispatched, supervised, or employed by Guardr on site
Responsible for your own licenses, insurance, taxes, and business compliance	Covered by Guardr as your employer

When you accept a job, you enter a **direct contract with that client** for that assignment. Guardr provides the platform, payment facilitation, and credential review tools — **not** security supervision or employment.

Guardr staff (Support through Founder) are **platform employees**. They verify marketplace eligibility and run operations. They do **not** employ you and do **not** assign normal field work — clients approve who works their site.

Related: [Quick Start](#) · [Client Manual](#) · In-app **Guide**

1. Choose the right signup

- **I'm a guard** — marketplace contractor work (**this manual**).
- **Apply to work at Guardr** — platform **staff employment** (ops/support). Guardr does **not** hire through guard signup.

2. Account lifecycle

Status	What you see	What to do
Pending	Activation screen — application under review	Upload credentials while staff reviews
Approved	Activation screen — finish credentials	Keep uploading; staff verify documents
Active	Full app (Map, Jobs, Pay, Messages, ...)	Find work and run shifts

While pending/approved: **Map**, **Jobs**, **Pay**, **Messages**, **Profile**, and **Guide** stay blocked. Approved guards can use **Contact support** (activation help).

3. Credentials required to go live

Staff verify these before marketplace access. Nothing auto-verifies on upload.

#	Credential	What to upload
1	Government ID	Front, back, selfie, state, number, expiration
2	Certificate of Insurance (COI)	General liability COI
3	BSIS Guard Card	Registration card photo
4	Mandatory training (PTA / UOF)	Power to Arrest and Appropriate Use of Force as separate certificates
5	Continuing Education	Full 32-hour first-year BSIS package (9 certificates)

32-hour CE package (9 certificates): Communication (4), Public Relations (4), Observation & Documentation (4), Liability/Legal (4), Officer Safety (4), Trespass (4), Evacuation (2), Crowd Control (2), Arrests/Search/Seizure (4).

Not required to activate: annual 8-hour BSIS refresher, many supplemental courses, weapons permits, medical, FEMA (optional extras may be verified later for client visibility).

How activation works

1. **Moderator+** approves your **application** (pending → approved).
2. **Administrator+** verifies each of the five credentials in **Credentials**.
3. When all five are verified, your account **activates automatically** (approved → active).

Official BSIS training reference: bsis.ca.gov/guard-training

4. Main pages (active guards)

Page	Purpose
Map	Open jobs, direct requests, heading/arrive/start/end shift
Jobs	Upcoming/past work, overtime review
Pay	Stripe Connect, earnings, payouts, shift pay history
Messages / Support	Job chat; tickets and formal reports
Profile	Resume, Credentials , inventory, Timesheet (read-only clock audit)

Page	Purpose
Performance	Overall / Standing / Driving priority
Vehicle	Vehicle + insurance for driving jobs (when applicable)
Preferences / Availability	Work style and schedule windows
Notifications / Settings / Guide	Inbox, app prefs, help

5. How pay and payouts work (contractor earnings)

This section explains **your** money as an independent contractor. Guardr collects from the client and facilitates payment to you. This is **not** a wage or salary from Guardr.

5.1 What you see vs what the client pays

The client pays a **posted hourly rate** for the job. Guardr keeps a **platform fee** per hour from the client's **Personal** or **Business** fee table (and that guard type); you receive the remainder as **guard pay**. The fee on a posted job stays frozen even if Directors later change the live tables.

Default example (platform settings may differ):

Item	Example
Client hourly rate	\$50.00 / hr
Platform fee (default flat)	\$5.00 / hr
Your guard pay	\$45.00 / hr
8-hour shift	You earn \$360.00 before taxes/expenses

On open-contract / negotiated jobs, the fee may be a flat dollar amount or a percentage of the client rate — the app shows **your rate and earnings** before you accept.

You do **not** see the client's full billing breakdown in guard views. Your **Pay** and job cards show **guard rate** and **guard earns**.

5.2 When earnings become available

Pay moves through stages after a shift:

Client pays → Job runs → Job complete → Pay released → You collect → Settled

Stage	Meaning	Your action
Awaiting client payment	Job not yet paid	None — wait for client
Job active	Paid and in progress	Work the shift
Awaiting payout release	Complete; pay not released yet	Wait (overtime/refunds may block)
Ready to collect	Pay released to you	Request a bank transfer on Pay
Paid	Funds sent or cash recorded	Done

Typical auto-release: about **48 hours** after job completion if there are no holds.

Payout can be blocked until:

- Client payment is confirmed
- **Overtime** is approved and paid (or waived) by the client
- **Early clock-out refunds** are settled
- An active **dispute hold** is cleared (staff may release after resolution)

5.3 Stripe Connect (bank deposits)

1. Open **Pay** → **Connect bank account** (Stripe Connect Express).
2. Complete Stripe onboarding — bank details stay with Stripe, not stored in Guardr.
3. When earnings are **ready to collect**, use **Send to my bank** (or wait for auto-transfer if enabled).

Connect your bank through Stripe on **Pay**, then request a bank transfer once pay is released.

5.4 Requesting a payout

When multiple jobs are ready, **Pay** lets you submit a **payout request** (payout invoice). Staff fulfill bank transfers through the **Payments** pipeline. Track status on **Pay** until **Settled**.

5.5 Overtime and adjustments

If you clock out late, **overtime** may be calculated. You and the client must **approve** overtime before those hours pay out. Disputed overtime can hold your payout until staff resolve it.

5.6 Taxes and business responsibility

You are an **independent contractor**. Guardr does **not** withhold income tax, workers' compensation, or employment benefits. You are responsible for:

- Your own tax reporting and payments
- Maintaining valid BSIS registration and insurance
- Business expenses and compliance with client site rules

Accept the **Independent Contractor Agreement** and **Guard Code of Conduct** in-app before marketplace access.

6. Find work

Marketplace job

1. Open **Map** → open a job pin/sheet.
2. Review location, schedule, **your pay**, requirements, instructions.
3. **Slide to apply for job.**
4. Wait for the **client** to approve or decline.

Direct request

1. Open the request on **Map**.
2. Review details → **Slide to claim job.**
3. Assignment appears under **Jobs**; shift controls appear when the window opens.

Multi-guard jobs

Each guard applies for a roster slot independently. The client approves each guard.

7. Run a shift

Within about 24 hours of start, **Map** may show a **Next Job** card with countdown.

1. Review briefing → **Slide to start heading** (clients see live location from en route).
2. On site → **Slide to arrive on site** (GPS required).
3. **Slide to start job.**
4. Complete **self-audit**: selfie, uniform, shoes — or **Skip self audit** only when necessary.
5. During the job: **Message client, Report incident, Activity report.**
6. End with **Slide to complete job / Slide to end shift** in the allowed window.
7. Optional client rating prompt; earnings show under **Pay** when rules are met.

Timesheet: Profile → **Timesheet** shows read-only clock audit (start/end times). You cannot edit shift times — the audit log is the record.

8. Overtime and help

1. **Jobs** → open the overtime-flagged job → **Approve overtime** if correct.

2. **Messages** for job chat; **Support** for tickets or **File a report**.

9. Performance, vehicle, driving

- **Performance:** Overall, Standing (foot/static), Driving (needs approved vehicle + valid insurance).
 - **Vehicle:** Upload vehicle insurance under credentials first, save vehicle details, submit for staff approval.
-

10. Typical sequence

Sign up → Upload creds → Application approved → Creds verified → Active
→ Connect bank → Apply/claim → Head / arrive / start + self-audit
→ Work → End shift → Pay released → Collect payout
